May 9, 2017

TO: Members
Wisconsin Legislature

FROM: Bob Lang, Director

SUBJECT: Distributional Data Regarding Assembly Republican Income Tax Proposal

At the request of numerous legislators, this memorandum provides information regarding the estimated impacts on taxpayers at various income levels of the tax proposal released by members of the Assembly Republican Caucus on May 4, 2017. The full tax proposal, and a related transportation budget proposal, are described in May 4 memorandums from this office to Representative Kooyenga.

Briefly, the major components of the income tax proposal are as follows: (a) beginning in tax year 2018, gradually reduce the marginal tax rates to a flat rate of 3.95% in tax year 2029 and thereafter; (b) eliminate the capital gains exclusion, alternative minimum tax (AMT), and working families credit beginning in tax year 2018; (c) eliminate the married couple credit and the property tax/rent credit (PTRC) for renters beginning in tax year 2019; and (d) reduce the 5% itemized deduction credit to 3% in tax year 2019 and to 2% in tax year 2020 and thereafter.

Attachments 1 through 12 to this memorandum present distributional data regarding the above provisions, for tax years 2018 through 2029, when the flat 3.95% tax rate would be fully implemented. The data is based on simulations prepared by the Department of Revenue (DOR) using estimated counts of taxpayers and income amounts for tax year 2018. All estimates are expressed in 2018-19 dollars.

The left-hand portion of each attachment shows a distribution, by Wisconsin adjusted gross income class, of the following: (a) the total number of tax filers under current law; (b) the count of taxpayers who would have a tax decrease under the proposal and the percent of total taxpayers with a tax reduction by income grouping; (c) the amount of tax decrease for such taxpayers and the percent of total decreases by income grouping; (d) the average tax reduction; (e) the percent change in tax for each group and (f) the share of all tax filers in each group who would have a tax

reduction. The right-hand portion of each attachment shows similar data for taxpayers who would experience a tax increase under the proposal.

Other provisions of the tax and transportation proposals are not reflected in the attachments because they cannot be simulated reliably. These relate to state and local sales taxes, the motor fuel tax, a fee on hybrid vehicles, the excise tax on little cigars, property tax credits, the historic rehabilitation credit, the income tax credit for taxes paid to other states, and contributions from individual retirement accounts to charitable organizations.
